EXPERIENCE

XEROSEC LLC

Software Engineer | Jan 2024 - May 2024

- Designed, built, and released new front-end for a script sharing platform using NX monorepo and component library documented with Storybook
- Integrated authentication with Azure B2C
- Set up CI/CD pipelines with Github Actions to deploy to Azure

BILL.COM / DIVVY

Software Engineer | Oct 2022 - Dec 2023

- Built and released new budget management tools including policy management and import functionality for budget groups
- Greatly improved test coverage and code readability
- Worked on migrating existing Javascript monorepo to new federated Typescript repositories

WALMART GLOBAL TECH

Software Engineer | Nov 2016 - Sept 2022

- Created an admin UI to manage an internal notification platform integrated into associate-facing mobile applications
- Applied UX practices in documentation and example projects for React Native, Android, and iOS SDKs
- Maintained the Apple code signing process for all associate-facing iOS applications involving hundreds of certificates
- Applied CI/CD to streamline numerous support processes
- Worked with the AI/ML team on a mobile app to improve data entry for verifying stocked items
