I am a full-stack engineer with a passion for creating **intuitive**, **research backed** user interfaces. The user always comes first! With over **9 years** of building **enterprise solutions**, I emphasize maintainability and efficiency in my work. I'm able to pick up new processes and tools very quickly. I've worked on projects from simple web pages to applications serving **millions of clients** and managing **billions of dollars** in transactions.

SKILLS & TOOLS

Typescript/Javascript	NextJS	Tailwind	Zeplin
React	Remix	User Experience (UX)	Azure
React Native	NodeJS	Sketch	Git
HTML | CSS | SASS	Vue	Figma	CI/CD
Kotlin / Java	Storybook	Adobe XD	

EXPERIENCE

XEROSEC LLC

Software Engineer | Jan 2024 - May 2024

- Designed, built, and released new front-end for a script sharing platform using NX monorepo and component library documented with Storybook
- Integrated Oauth2 with Azure B2C
- Made CI/CD pipelines with **Github Actions**

BILL.COM / DIVVY

Software Engineer | Oct 2022 - Dec 2023

- Created new budget tools including policy management and import functionality for budget groups serving **461,000 businesses** controlling over **$4 billion** in total payment volume (TPV)
- Greatly improved test coverage and code readability
- Worked on migrating legacy Javascript monorepo to new federated Typescript repositories

WALMART GLOBAL TECH

Software Engineer | Nov 2016 - Sept 2022

- Worked on a notification system for store emergency alerts such as inclement weather, active shooter situations, and COVID exposures
- Created an admin UI to manage an internal notification platform integrated into **200+ business-facing mobile applications**
- Maintained the Apple code signing process for all internal iOS applications involving hundreds certificates and **600+ provisioning profiles**
- Applied UX practices in documentation and example projects shared with thousands of associates
- Worked with the **AI & Machine Learning** team on a mobile application to improve data entry
- Contributed to NodeJS and Java Spring APIs
- Managed deployments to hybrid cloud infrastructure hosted on-prem and in Azure
- Applied **CI/CD pipelines** to streamline numerous support processes using Jenkins

DESIGN PICKLE

Software Engineer | Sept 2024 - Current

- Migrated web app from legacy Rails-served React app to new **Remix** system
- Improved test coverage
- Set up CI/CD workflow to publish **Storybook** implementations of both legacy and new applications
- Released new project management features as well as numerous bug fixes
